Expertise: Oil markets and operations in the United States and globally, Refinery optimization, Supply chain management, Inventory management and Risk management

Biography: Tom O'Connor is a Project Manager at ICF Consulting, LLC. He has extensive experience in the energy area, having spent over 30 years with Mobil Oil and, prior to that, Exxon. His background also includes work with a respected Energy management company, directing natural gas and power procurement for major energy consuming companies.

Mr. O'Connor's responsibilities at Mobil over a number of years included responsibilities from trading and marketing crude oil, optimizing refinery operations, and in managing the downstream distribution system from the refineries to marketing terminals. He has been directly involved in dealing with supply disruptions due to severe weather, political actions, refinery outages, and implementation of changing product specifications.

His experience at Mobil and Exxon also included positions at refineries and in planning and analysis.

Mr. O'Connor has deep experience in global crude and product markets, market structure and basis, refining economics and technology, and logistics. He applies those skills to analyze and recommend strategic and tactical initiatives for public and private clients at ICF Consulting.

Mr. O'Connor holds a B.S. degree in Chemical Engineering from the University of Notre Dame.
